L'AZIENDA - THE COMPANY

IL MONDO MY FUN E LE SCELTE AZIENDALI

My Fun è il marchio di PM Modifiche srl dedicato alla LINEA GIOCHI da esterno ed arredo urbano.
Il nostro slogan è: "Il nostro Lavoro è Costruire il Divertimento".

Le scelte da noi operate nell'utilizzo dei materiali che compongono i nostri Giochi sono portate a soddisfare pienamente le aspettative della clientela:

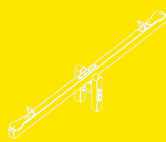

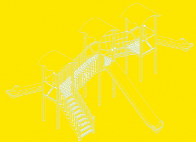

- Legno di LARICE, che con una crescita molto lenta ed omogenea, crea una fibra del legno molto resistente, garantendo alla struttura dei giochi una durata maggiore rispetto alle normali tipologie di legno oggi utilizzate nel mercato dei giochi (Pino, Abete). Questo anche con una ridotta manutenzione;
- L'Alluminio, per chi non vuole più avere pensieri per la manutenzione rimanendo però con un prezzo non di molto superiore al legno.
- i particolari metallici vengono realizzati in acciaio zincato e verniciati a polveri in appositi forni di cottura; le staffe per il fissaggio a terra, sono in acciaio zincato a caldo;
- i pannelli sono realizzate in Polietilene, materiale atossico con splendide colorazioni che rimangono inalterate nel tempo grazie a dei filtri resistenti agli UV, permettendo di essere puliti con facilità da scritte o disegni;
- Lo Staff My Fun è qualificato ed in grado di interpretare al meglio le vostre esigenze, trasferendole in progetti realizzabili, rispettando tutte le normative per la sicurezza dei parchi gioco e dei loro utilizzatori, secondo la UNI 11123;
- Il nostro ufficio tecnico è a completa disposizione dei clienti;
- possiamo fornire nostro personale qualificato per l'installazione dei nostri giochi così da poter rilasciare anche la certificazione di una corretta installazione in ottemperanza alle normative vigenti EN 1176 2008;
- a disposizione personale tecnico abilitato in grado di supportarvi nella realizzazione di piani per le manutenzioni programmate in conformità alle EN 1176-7 2008, tale personale è in grado di eseguire le stesse, rilasciandovi opportuna Certificazione
- Le attrezzature e i giochi hanno superato i rigidi controlli di sicurezza secondo i criteri della norma EN 1176/08 dall'Ente Certificatore TUV.
- Siamo Abilitati al Mercato Elettronico CONSIP - ACQUISTI IN RETE della Pubblica Amministrazione

MY FUN WORLD AND THE COMPANY'S CHOICES

My Fun is a trademark of PM Modifiche srl company, offering outdoor playground equipment as well as street furniture. Our slogan is the following: "Our Job is to Create Fun".

Our thoughtful choice in using certain types of materials for our playground equipment and street furniture is carried out to fully satisfy our clients' needs.

- LARCH wood, belonging to the Pinaceae family, is valued for its tough, waterproof and durable qualities. It is a slow-growing tree which produces an extremely strong fibre and requires a low maintenance thus making it ideal for a longer life of playground equipment in comparison to other types of wood like fir wood and pinewood commonly used in playground equipment.
- ALUMINIUM is the best choice for a low maintenance at a feasible price.
- Metal parts are made in galvanized steel and powder-coated in special ovens; the fixing brackets are galvanized steel.
- Panels are in polyethylene which is a non-toxic material, they are in fast colours thanks to UV-resistant filters, resistant to impacts and wear and have an easy-to-clean surface.
- My Fun Collection staff has the skills to meet your needs by creating personalized projects with the priority to respecting all the safety UNI 11123 regulations required for playground equipment.
- Our technical department is available at all times for any queries.
- Our qualified technicians put up the playground equipment and then issue a certificate of completed installation carried out in accordance with EN 1176-7 2008 regulations.
- Our technicians are available to support you in planning your maintenance work in conformity to EN1176-7 2008 regulations or otherwise after carrying out the maintenance work they issue a certificate of the work done.
- All playground equipment and street furniture have passed the strict safety checks according to the parameters of the EN 1176/08 regulations by the certification authority TUV.

MADE IN ITALY

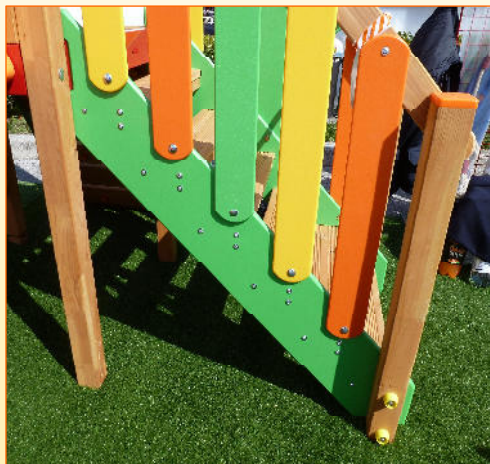

PARTICOLARI PERFETTI PER PRODOTTI DI ELEVATA QUALITÀ

Gradevolezza e sicurezza contraddistinguono i nostri giochi.
Finiture accorte per rendere perfetti esteticamente i prodotti e garantirne una lunga durata.

PERFECT DETAILS FOR HIGH-QUALITY PRODUCTS

Cheerfulness and safeness characterize all our playground **equipment**.
Detailed finishing-touches make our products aesthetically perfect and guarantee long life.

FIANCO SCALA

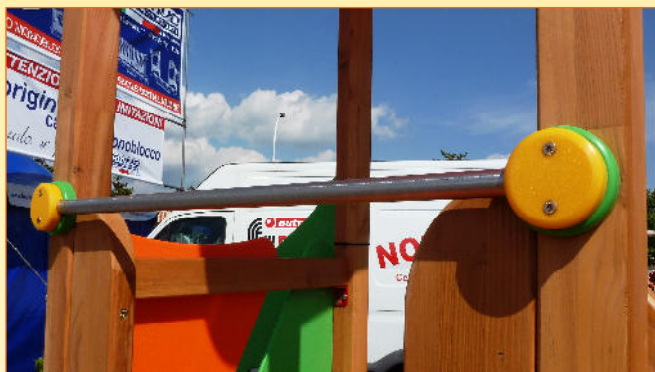

in polietilene pantografato e preforato
Pantographed and perforated polyethylene **SIDE STAIRCASE**.

PEDANA (Linea Village e City)

in acciaio, zincato e verniciato con fori di fissaggio per ponti e staffa scivolo.

Galvanized steel and varnished **PLATFORM** with fixing holes for bridges and slide bracket.

BARRA REGGISPINTA

in acciaio inox con fissaggi in polietilene pantografato e arrotondato
Stainless steel **THRUST-BEARING ROD** with pantographed and rounded polyethylene fixing.

PARATIE LATERALI

in polietilene divise in 2 pezzi con travetti in larice di fissaggio e travetto nella parte inferiore con inclinazione a 45° per l'impedimento all'arrampicata
Polyethylene **SIDE BULKHEADS** divided in 2 pieces with larch fixing beams. The lower beam has a 45° inclination to avoid climbing.

SCALINO e SOTTOSCALINO
con incasso nel fianco scala
STEP and UNDERSTEP
embedded in the side of staircase.

COPRIPALO di protezione in polietilene
Polyethylene **POLE COVER** protection.
